## GRAIN MARKET STRENGTHENS

Cash grain prices strengthened during the week ended January 8. Trading improved as relatively light receipts found fairly good demand.

Winter wheat closed 2-3¢ per bushel higher; Spring wheat, 3¢ higher; and Durum wheat, 3-4¢ higher. Strength in wheat reflected light country marketings, fairly large sales of flour to chain bakers, government flour buying for domestic and export donations, and resumption of export activities following the holidays. White wheat was unchanged to 2¢ higher on light marketings in Portland. Rye, bolstered by good demand for top quality offerings and some export sales, finished 2¢ higher at Minneapolis.

Corn ranged 1-5¢ per bushel higher at the close. Country sales remained light and offerings fell short of good demand. Export interest in corn was also a supporting factor. Oats and barley markets were firm, except for a 4¢ loss on malting barley at Minneapolis. Limited offerings of oats found good demand at most markets. Export interest in barley remained fairly active, but maltsters were selective at Minneapolis and demand was rather narrow. Grain sorghums, influenced by light offerings and good export demand, closed 3-4¢ per cwt. higher.

Soybeans finished 2-3¢ per bushel higher, reflecting light receipts and strong processor demand. Flaxseed was unchanged at Minneapolis, with offerings extremely light.

### Special Features

PROTEIN INSPECTION PROCEDURES FOR CARGO WHEAT: Formal procedures for inspection of cargo wheat for protein content were announced this week. Requests have been made for this type of service in connection with wheat for export. Service will supplement inspection and grading of grain for quality under the U. S. Grain Standards Act and will be performed at the request of interested parties on a fee basis.

IWA SALES: Sales of wheat and flour under the International Wheat Agreement program totaled 2,088,000 bushels during the week ended January 6. This brought sales for the season to date to 56.3 million bushels compared with 62.4 million a year earlier. Balance remaining for sale under the quota this season is 72.4 million bushels as against 66.1 million a year ago.

Average prices received by farmers, effective parity, and support rates  
(Dollars per bushel except grain sorghums per cwt.)

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats, or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

**COMMODITY CREDIT CORPORATION INVENTORY AND SALES**  
(All data in 1,000 bushels except grain sorghums in 1,000 cwt.)

NOTE: Data are based on weekly reports of inspections for export by licensed grain inspectors and do not include rail or truck movement to Canada or Mexico. In some cases the ultimate destination of the grain exported is not shown on the inspection reports, therefore, the quantity of each country may vary from official Census data which are based on custom declarations.

**GRAINS: Inspections for export by ports and lake shipments to Canada**

December 1958

1/ Does not include imported wheat, which for the United States totaled 11.1 million bushels in 1957-58 and averaged 13.2 million for the 6 years 1951-56. Imports into the other countries were generally very small except in 1951-52 when around 8 million bushels were imported into Argentina.

## MOST GRAINS WEAKEN

Most cash grains, except sorghums, showed an easier trend during the week ended January 15. Trading was erratic - active at some sessions but slow at others - and generally reflected supply and demand conditions at individual markets.

Softness in wheat was attributed mainly to weakness in futures prices. Winter wheat sales by farmers remained light, but country offerings of Spring wheat increased. White wheat firmed up at Portland on the strength of improved export demand. Rye moved slowly and declined along with wheat at Minneapolis.

Feed grains were under pressure from huge stocks, but this was partly offset by some export and processor demand. Corn, oats and barley prices showed little or no change for the week. A slight daily advance brought larger offerings but bids were quickly lowered on the increased receipts and prices dropped back. Milo, influenced by good export demand for light offerings, strengthened this week and finished at the highest point of the season.

Soybeans and flaxseed, bolstered largely by strong meal and oil markets, were unchanged.

\*\*\*\*\*  
\* Revisions in U. S. Grain Standards for corn were announced today. Major \*  
\* revisions are: (1) a change from the water oven to the air oven as the basic \*  
\* method for determination of moisture content, and (2) an increase in minimum \*  
\* test weight per bushel requirements in the numerical grades. Change in the \*  
\* basic oven method for determining moisture will result in a net increase of \*  
\* about one half of one percent in the percentage of moisture. Minimum test \*  
\* weight will be increased from 54 pounds to 56 pounds in Grade No. 1 and by \*  
\* one pound in Grades 2, 3, and 4, and by two pounds in Grade No. 5 \*

FEED GRAIN EXPORT SALES: Export sales of feed grains (corn, grain sorghums, barley, rye and oats) under the CCC Export Credit Sales Program have been resumed to certain countries. Limiting sales for export of CCC-owned feed grains under the credit program to certain countries is aimed at preventing interference with export movement of feed grains from commercial supplies. Sales will not be approved under the credit sales program to the following countries: Canada, Cuba, Mexico, Panama, Belgium-Luxembourg, Denmark, West Germany, Italy, Ireland, Netherlands, Norway, Switzerland, United Kingdom, Sweden, and Japan. These countries are ones to which dollar sales of feed grains have normally been made. Applications for sales of feed grains under the credit program will be accepted to most other countries.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats, or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

**COMMODITY CREDIT CORPORATION INVENTORY AND SALES**  
(All data in 1,000 bushels except grain sorghums in 1,000 cwt.)

The above rates for wheat and flour shall serve as the export allowances to be used in establishing prices for CCC wheat for export under Announcements GR-261 and GR-262 (Barter), except that the export rate period expiration date does not apply to the GR-261 and GR-262 programs. For the class "Mixed Wheat" on all coasts, the respective rates for the classes comprising the mixture will apply.

## GRAIN MARKETS FIRM

Cash grain prices closed unchanged to slightly stronger for the week ended January 22. Offerings of most grains were light but generally adequate for current demand.

Firmness in Winter and Spring wheat reflected continued light country selling, snow and cold weather which cut down receipts at terminal markets, and anticipated export trading. Country selling of White wheat slowed following reduced export buying and prices attracted only meager offerings at Portland. Rye held firm despite fairly liberal offerings at Minneapolis.

Cash corn closed unchanged to 3¢ per bushel higher at major markets, influenced mainly by good demand for relatively light offerings. Good demand for meager offerings of oats kept prices in a firm position. Barley showed a weaker undertone as export demand slowed and present prices attracted only slim offerings. Grain sorghum prices dropped 6-7¢ per cwt. at Kansas City as buyers resistance mounted in view of the price relationship between milo and corn. Ft. Worth prices, however, went up 2¢ behind good domestic and export demand.

Soybeans advanced 2-3¢ per bushel at terminal markets and 3-4¢ at Illinois country points. Strength was attributed to continued good processor demand, the large amount of soybeans under price support, and extension of the resale program to soybeans. Improved demand boosted flaxseed 5¢ at Minneapolis.

\*\*\*\*\*  
\*      Official U. S. Grain Standards for Oats will be revised and those for \*  
\* Feed Oats and Mixed Feed Oats will be canceled effective June 1, 1959. Revi- \*  
\* sions provide for an increase in the test weight per bushel for the several \*  
\* numerical grades and in the special grade Heavy Oats. Minimum test weight \*  
\* per bushel in the special grade Extra Heavy Oats will not be changed. Minimum \*  
\* moisture content for Tough Oats will be reduced. No changes will be made in \*  
\* minimum limits of sound cultivated oats or the maximum limit of heat-damaged \*  
\* kernels, foreign material, and wild oats in the numerical grades. Additional \*  
\* changes of minor significance will be made in order to clarify and simplify \*  
\* existing standards. Standards for feed oats and mixed feed oats are being \*  
\* canceled because very little oats and wild oats mixtures for which these \*  
\* standards were promulgated are now marketed and mixtures of these grains which \*  
\* do not meet the requirements of the revised oats standards will be graded as \*  
\* Mixed Grain. \*

PRICE SUPPORT: All grains, except barley, are moving under support in larger quantities this season than last. Through December 31, 1958, farmers put a record 489.1 million bushels of 1958-crop wheat under price-support loans and purchase agreements. This compares with 209.6 million bushels under support on January 15, 1958, and the previous record of 476.6 million through January 15, 1954. Of the total 1958-crop wheat put under support, loan repayments through December 31 totaled 25.2 million bushels. Most of these were in seven states--about 1.6 million bushels in Idaho, 1.4 million in Kansas, 1.9 million in North Dakota, 7.0 million in Oklahoma, 2.0 million in Oregon, 3.5 million in Texas, and 5.9 million in Washington. Soybeans and grain sorghums (97.7 million bushels and nearly 100 million cwt. through December 31) continued to move under support in record quantities. Farmers put 108.6 million bushels of 1958-crop corn under support through December 31, 1958, compared with 80.6 million through January 15, 1958. Details of grains under price support by states are shown on pages 7-10.

SOYBEAN RESEAL PROGRAM: Farm-stored 1958-crop soybeans under price support have been added for the first time to the reseal program. Under the program, farmers in designated areas will be able to extend their farm-storage loans or convert their purchase agreements to loans for another year following the price-support loan maturity date of May 31, 1959. Eligibility requirements under the reseal program will be the same for quality and storage as under original loans. Storage payments will be earned by farmers for the period of reseal. Storage payments for the full year's reseal on soybeans are 16¢ per bushel in some states and 17¢ in others. If a farmer redeems his resealed soybeans prior to the new maturity date, his storage payments will be prorated. Payment will be made at the end of the storage period.

IWA SALES: Sales of wheat and flour under the International Wheat Agreement program totaled 2,070,000 bushels during the week ended January 20. This brought sales for the season to date to 59.1 million bushels compared with 67.7 million a year earlier. Balance remaining for sale under the quota this season is 69.6 million bushels as against 60.8 million a year ago.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats, or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

# COMMODITY CREDIT CORPORATION INVENTORY AND SALES

(All data in 1,000 bushels except grain sorghums in 1,000 cwt.)

1/ Carlot receipts have been converted to bushels on the basis that 1 carlot equals 1,750 bushels.

2/ Of the December receipts, 2,000 bushels were Black, 11,020 Mixed, and the remainder Yellow soybeans. Inspections of soybeans in December included 4,870,000 bushels as cargo lots, 3,888,263 bushels as truck receipts, and the balance as carlot receipts.

Based on reports of inspections by licensed grain inspectors at all markets.

## QUARTERLY SUMMARY AND STATISTICS

GRAIN DIVISION

AGRICULTURAL MARKETING SERVICE

UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 2 No. 1

Washington 25, D. C.

January 28, 1959

Grain prices at the end of January showed a mixed trend compared with a year earlier. Wheat averaged 18¢ per bushel lower. Corn, recovering from early weakness, finished 5-10¢ higher. Other feed grains and rye also ruled higher. Soybeans closed 2-5¢ under a year earlier even though prices advanced steadily during the month. Flaxseed was around 25¢ lower.

Wheat prices in January averaged 12-24¢ per bushel below a year ago. Winter wheat and ordinary protein Spring wheat generally sold 7-15¢ below the effective support rate, but high-protein Spring wheat, Durum and White wheat were around or above support. Fifteen percent protein Spring wheat sold 16¢ per bushel above ordinary protein in January. A year ago, the premium was only 6¢. Stocks of wheat in all positions January 1 totaled a record 1.8 billion bushels, almost a third larger than a year earlier. Of the total stocks, the Commodity Credit Corporation owned 774 million bushels. An additional 480 million bushels were outstanding under support or resale, leaving around 560 million bushels of "free" wheat as against 430 million a year ago. Of the total CCC-owned stocks, 575 million bushels were 1.1 billion Winter, 154 million Hard Spring, 2 million Soft Winter, 29 million White and 13 million Durum. Nearly 208 million bushels of wheat and flour were exported during July-December 1958, or 14 million more than a year earlier. Flour millings the first six months this season totaled 291 million bushels -- the largest since 1948. January 1 wheat supplies for export or carryover in the United States, Canada, Argentina and Australia totaled 2.5 billion bushels as against 2.1 billion a year ago. Smaller Canadian supplies were almost offset by larger Australian supplies. Argentine supplies were about the same.

Rye average 4¢ per bushel higher this January than a year earlier. Cash prices were about at effective support level in Minneapolis. Rye stocks, 24.3 million bushels on January 1, were 4.5 million larger than a year ago. Disappearance of 21.3 million bushels from July-December was 4 million more than the same period the previous season and the second largest in over 10 years. Rye exports totaled a little over 6.5 million bushels, or 4 million more than a year earlier. Usage of 2.2 million bushels for alcohol production was up slightly, while the 2.3 million used for milling were the smallest of record. The 5.3 million bushels remaining for feed were about the same as the two previous years.

Corn prices, after dropping to the lowest point since World War II in November, advanced in January. At the end of the month, prices averaged 5-10¢ per bushel above a year earlier. Record January 1 corn stocks of 3.9 billion bushels were 315 million above a year ago. CCC owned 1.1 billion bushels of the total stocks, with an additional 235 million under loan or resale. Disappearance of corn as grain during the October-December quarter totaled 986 million bushels -- 105 million more than a year earlier and the largest for the quarter since 1951. Most of the estimated 385 million bushels harvested for silage, forage, hogging and grazing was

consumed the first part of the season. Record exports of 60 million bushels of corn so far this season exceeded the same months last season by around 2 million. Commercial use continued heavy, with nearly 37 million bushels of corn used for wet process milling and 9 million for alcohol production. With an estimated 171 million - 10 million more than a year ago - grain consuming animal units, corn fed per animal unit totaled 5.2 bushels the first quarter compared with 4.9 bushels a year earlier.

Oats sold about the same or slightly above a year ago at the end of January. Stocks of 1.0 billion bushels on January 1 were 13 percent above a year earlier and the second largest of record. Disappearance, mainly for feed, totaled 701 million bushels during July-December, or 11 percent more than a year earlier. Exports of nearly 13 million bushels were about the same, but imports of 2 million were down sharply from the 15 million a year earlier.

Barley, reflecting record exports and heavy feeding, averaged 12¢ per bushel higher this January than last. Malting type, however, was 6¢ lower. Record barley stocks of 390 million bushels on January 1 were eight percent above a year earlier, with 70 million owned by CCC. Another 86 million were outstanding under support. Barley disappearance, 257 million bushels during July-December, was 39 million above the same months the previous season and the largest since 1942. Exports of 68 million bushels were double those of a year ago, while imports of 8 million were down 5 million. Industrial usage of 43 million bushels was down slightly, but feeding of 141 million was the largest since 1943.

Grain sorghum prices, bolstered by heavy loan impoundings and larger exports, averaged 12¢ per cwt. higher in January than a year ago despite record supplies. January 1 stocks of 404 million cwt. were 114 million above the previous record a year ago. CCC owned 161 million cwt. of the total stocks and had 102 million under support -- more than double comparable figures a year earlier. First quarter disappearance totaled 114 million cwt. of which 99 million were fed, 13 million exported and the balance used industrially. A year ago, disappearance totaled 70 million cwt. of which 65 million were fed, 4 million exported and the balance used industrially.

Soybeans finished January 2-5¢ per bushel lower than a year earlier. Record stocks of 469 million bushels at the first of the month were 23 percent above the previous record a year ago. CCC owned 12 million bushels of the total stocks, and 98 million bushels - twice as much as a year earlier - were under support. Exports of around 41 million bushels in the October-December quarter were up slightly from the same quarter last season, while crushings of over 101 million showed an increase of 16 million.

Flaxseed at the end of January averaged 25¢ per bushel below the same month last year. January 1 flaxseed stocks totaled 31 million bushels, or 9 million more than a year earlier. Only a small portion were owned by CCC, but nearly 9 million bushels were under support compared with 2 million a year ago. Flaxseed crushings and exports during July-December were well below the same period last season. Crushings totaled 12.4 million bushels as against 16.6 the first half of 1957-58, while exports of 4.4 million compared with 9.0 million a year earlier.

1/ Owned and stored in bins or other storage owned or controlled by CCC. Additional CCC-owned grain is included in other positions.

2/ All off-farm storages not otherwise designated, including merchant mills.

3/ Mostly quantity fed, but includes oats for oatmeal currently estimated at 37 million bushels annually. Also includes waste, loss, and statistical errors in estimates.

Barley: Supply and distribution, 1952-59

1/ Owned and stored in bins or other storage owned or controlled by CCC. Additional CCC-owned grain is included in other positions.

2/ All off-farm storages not otherwise designated, including merchant mills.

3/ Used for brewing, distilling, malt products, and pearling.

4/ Mostly quantity fed, but includes waste, loss, and statistical errors in estimates.

Grain sorghums: Supply and distribution, 1956-59

1/ Owned and stored in bins or other storage owned or controlled by CCC.

Additional CCC-owned grain is included in other positions.

2/ All off-farm storages not otherwise designated, including merchant mills.

3/ Principally alcohol and distilled spirits. Includes an allowance for wet-process milling.

4/ Mostly quantity fed, but includes other uses, waste, loss and statistical errors in estimates.

Soybeans: Supply and distribution, 1952-59

1/ Quantity of current crop placed under support minus the quantity of loans repaid. Data for January 1, 1958, estimated to be the midpoint between the quantity on December 15, 1957, and January 15, 1958.

2/ Quantity of previous crops under reseal, extended reseal, or re-extended reseal. Includes loans outstanding from the previous crop-year program not yet delivered or resealed.

3/ Total grain in all positions as reported by Agricultural Estimates Division, AMS.

## MIXED TREND RULES GRAIN MARKETS

Cash grain markets displayed a mixed price trend during the week ended January 29. Most wheat and grain sorghums strengthened, but other grains weakened.

Winter, Spring and Durum wheat held firm on continued light country selling. Offerings, however, were generally adequate for current domestic and export demand. White wheat weakened slightly at Portland. Rye lost 4¢ at Minneapolis.

Corn prices weakened as demand slowed when buyers became more conservative following the report of record stocks. Oats and barley, influenced mainly by large stocks and rather dull trading, were unchanged to a little weaker at the close. Grain sorghum prices, influenced by good demand for light offerings, worked 1-5¢ per cwt. higher at Kansas City and 2¢ higher at Fort Worth.

Softness in soybean prices reflected record stocks, less active demand and weakness in the meal market. Flaxseed went down 3¢ per bushel in limited trading at Minneapolis.

NON-COMPLIANCE CORN: Nearly 49 million bushels of the 108.6 million bushels of 1958-crop corn put under price support through December 31, 1958, came from non-compliance farms. This corn went under support at a national average price of \$1.06 per bushel. Of the non-compliance corn under support, 47.5 million bushels were farm-stored loans, a little over 1.0 million warehouse-stored loans, and about 505,000 bushels were purchase agreements. Eight states accounted for the bulk of non-compliance corn under support through December 31. These states, with the amount under support in million bushels in parentheses, were: Illinois (5.2), Indiana (2.1), Iowa (19.5), Minnesota (6.1), Missouri (1.7), Nebraska (9.5), Ohio (1.0), and South Dakota (2.4).

IWA SALES: Sales of wheat and flour under the International Wheat Agreement program totaled 1,553,000 bushels during the week ended January 27. This brought sales for the season to date to 60.6 million bushels compared with 69.6 million a year earlier. Balance remaining for sale under the quota this season is 68.1 million bushels as against 58.9 million a year ago.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

**COMMODITY CREDIT CORPORATION INVENTORY AND SALES**  
(All data in 1,000 bushels except grain sorghums in 1,000 cwt.)

## GRAIN MARKETS MIXED IN LIGHT TRADING

Cash grain prices continued to show a mixed trend during the week ended February 5. Wheat and rye were firm, but most other grains weakened. Trading was generally light.

Firmness in Winter wheat reflected light offerings and fair export interest. Spring, Durum and White wheat showed little or no change. Rye went up 3¢ per bushel at Minneapolis as receipts dropped off and demand became more aggressive.

Corn prices weakened. Country selling remained slow, but CCC sales of out-of-condition corn helped satisfy good demand. Oats and barley prices fluctuated within a narrow range but closed on the weak side except for a 4-6¢ advance on Malting barley at Minneapolis. Trading on oats and barley was restricted partly by light offerings. Grain sorghum prices declined slightly as offerings increased and demand slackened.

Weakness in soybeans and flaxseed reflected slow trading and softness in meal and oil markets.

GRAIN EXPORTS: Inspections of wheat (grain only) for export totaled 31.9 million bushels in January. This was slightly under December inspections but about 7 million bushels more than January 1958. Since July 1, 1958, about 196.7 million bushels of wheat have been inspected for export compared with 186.5 million the same period last season. Of the 31.9 million bushels exported in January, 1.9 million were Hard Red Spring, 13.9 million Hard Red Winter, 1.8 million Soft Red Winter and 14.2 million White. About 45 percent of the Hard Red Winter wheat inspected and nearly 65 percent of the White wheat was destined for India. Of the Soft Red Winter, almost a half was for the United Kingdom and about a fourth for Yugoslavia. Other January inspections included 3.3 million bushels of oats, 9.3 million barley, 10.0 million grain sorghums and 8.5 million soybeans -- all of which were substantially above a year earlier. Inspections of 15.8 million bushels of corn and 443,000 bushels of rye were slightly smaller than the year before.

IWA SALES: Sales of wheat and flour under the International Wheat Agreement program totaled 2,926,000 bushels during the week ended February 3. This brought sales for the season to date to 63.5 million bushels compared with 70.9 million a year earlier. Balance remaining for sale under the quota this season is 65.2 million bushels as against 57.6 million a year ago.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats, or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

**COMMODITY CREDIT CORPORATION INVENTORY AND SALES**  
(All data in 1,000 bushels except grain sorghums in 1,000 cwt.)

NOTE: Data are based on weekly reports of inspections for export by licensed grain inspectors and do not include rail or truck movement to Canada or Mexico. In some cases the ultimate destination of the grain exported is not shown on the inspection reports, therefore, the quantity of each country may vary from official Census data which are based on custom declarations.

1/ Consists of 1,190,083,000 bushels carlot inspections (643,288 carlots converted to bushels at 1,850 bushels per car), 75,830,000 bushels truck inspections, and 119,947,000 bushels cargo inspections.

2/ The percentage figures are not strictly comparable since the wheat standards, revised June 15, 1957, reduced the limits of foreign material, of shrunken and broken kernels and of wheat of other classes, and otherwise improved the quality of the grades.

## GRAIN MARKETS HOLD FIRM

Cash grain markets generally closed unchanged to slightly higher for the week ended February 12. Trading continued light.

Strength in wheat was attributed to light country offerings and rather brisk export business. Severe winter weather caused only light crop damage to Winter wheat and moisture reserves increased as a result of rain and snow. Spring wheat held steady at Minneapolis as light receipts were more than sufficient for limited buying orders. Durum wheat, however, firmed up on skimpy receipts. Rye edged forward at Minneapolis, influenced by acceptance of small parcels for export shipment.

Firmness in corn prices reflected good demand, particularly from feed interests, and light marketings as a result of bad road conditions in the country. Oats and barley prices showed little or no change in limited trading. Meager offerings of grain sorghums found only light demand and prices were unchanged.

Strength in soybeans stemmed mainly from the lack of producer selling and improved prospects for export business in soybean oil. Some crushers raised bids in order to obtain needed supplies. Interest in flaxseed was light, but there was enough demand from some buyers for extremely small offerings to hold prices steady at Minneapolis.

IWA SALES: Sales of wheat and flour under the International Wheat Agreement program totaled 1,456,000 bushels during the week ended February 10. This brought sales for the season to date to 65.0 million bushels compared with 71.7 million a year earlier. Balance remaining for sale under the quota this season is 63.7 million bushels as against 56.8 million a year ago.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats, or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

The above rates for wheat and flour shall serve as the export allowances to be used in establishing prices for CCC wheat for export under Announcements GR-261 and GR-262 (Barter), except that the export rate period expiration date does not apply to the GR-261 and GR-262 programs. For the class "Mixed Wheat" on all coasts, the respective rates for the classes comprising the mixture will apply.

1/ The West Coast wheat rate for the export period July 26 through August 14, 1959, is applicable to all exports of 1959-crop wheat from California ports even though such wheat may be exported before July 26.

## GRAIN MARKETS LITTLE CHANGED

Cash grain markets fluctuated within a narrow range and prices showed little or no change for the week ended February 19. Trading was slow, receipts were light, and interest centered on announcements of loan impoundings and 1959-crop support rates.

Winter wheat weakened, reflecting less active domestic and export demand. Spring and Durum wheat held firm, bolstered mainly by light marketings. Firmness in White wheat was influenced by continued light country offerings, rather tight "free" supplies, and moderate export sales to Japan. Rye weakened slightly in slow trading at Minneapolis.

Feed grains - corn, oats, barley and grain sorghums - were generally unchanged to a little weaker at the close. Trading was limited to some extent by light offerings and only fair demand. Although the amount of grains under price support was large, this had been anticipated and the trade showed more interest in what effect lower support rates would have on the market.

Weakness in soybeans reflected easier oil and meal markets and lower support rates. Flaxseed went up 3¢ per bushel at Minneapolis, with fairly good processor demand for extremely light offerings.

\*\*\*\*\*  
\*  
\* A proposal has been made to revise official U. S. Grain Standards for \*  
\* Mixed Grains. Since the feed oats and mixed feed oats standards will be \*  
\* canceled effective June 1, 1959, the proposal provides for a few minor \*  
\* changes in the standards for mixed grains in order to permit wild oats, and \*  
\* certain mixtures of oats and wild oats, to be graded as mixed grain. \*  
\*

SUPPORT RATES ANNOUNCED: Price supports for 1959-crop rye, oats, barley, grain sorghums, soybeans and flaxseed were announced February 18. National average dollars-and-cents supports for 1959, with 1958 rates in parentheses, are: Rye . 90¢ (\$1.10) per bushel for Grade No. 2 or better, or Grade No. 3 on test weight only; oats - 50¢ (61¢) per bushel for Grade No. 3; barley - 77¢ (93¢) per bushel for Grade No. 2 or better (except mixed barley); grain sorghums - \$1.52 (\$1.83) per cwt. for Grade No. 2 or better (except mixed grain sorghums); soybeans - \$1.85 (\$2.09) per bushel; and flaxseed - \$2.38 (\$2.78) per bushel for Grade No. 1. Beginning with 1959 crops, as authorized by new legislation, so-called "equity" payments will not be made in connection with the takeover of commodities pledged as collateral for price-support loans.

MINIMUM SUPPORT PRICE FOR CORN: A minimum national average support price of \$1.12 per bushel for 1959-crop corn was announced under a new program. This price reflects 90 percent of the preliminary average price of \$1.25 per bushel received by farmers for corn during the three calendar years 1956-58. The new program provides for a new method of setting corn price supports and eliminates corn acreage allotments and the commercial corn-producing area. Corn produced anywhere in the U. S. in 1959 that meets quality and storage requirements will be eligible for support at the same national average level with adjustments for grade, quality, location and other factors. So-called "equity" payments will not be made in connection with the takeover of commodities pledged as collateral for price-support loans.

GRAINS UNDER PRICE SUPPORT: All grains, except barley, continued to move under price support in larger quantities this season than last. Farmers put a record 568.6 million bushels of 1958-crop wheat under price-support loans and purchase agreements through January 31, 1959. This compares to the old record of 553.6 million bushels put under support from the 1953 crop. Most of the 31.1 million bushels of 1958-crop wheat on which loans had been repaid were in seven states -- 2.0 million in Idaho, 1.7 million in Kansas, 2.9 million in North Dakota, nearly 8.0 million in Oklahoma, 2.4 million in Oregon, 4.3 million in Texas, and 6.8 million in Washington. Over 230.7 million bushels of 1958-crop corn were under support through January 31, well above the amount of 1957-crop corn under support a year earlier. Of the 230.7 million bushels of corn under loan and purchase agreements, 96.6 million bushels came from farms not complying with acreage allotments. Record quantities of soybeans and grain sorghums (124.3 million bushels and 141.9 million cwt.) had been put under support through January 31. Details of grains under price support by states are shown on pages 8-15.

IWA SALES: Sales of wheat and flour under the International Wheat Agreement program totaled 465,000 bushels during the week ended February 17. This brought sales for the season to date to 65.5 million bushels compared with 73.5 million a year earlier. Balance remaining for sale under the quota this season is 63.2 million bushels as against 55.0 million a year ago.

Cash grain closing prices compared with support price at principal terminals 1/

All prices rounded to nearest cent per bushel except grain sorghums per cwt.

1/Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats, or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

**COMMODITY CREDIT CORPORATION INVENTORY AND SALES**  
(All data in 1,000 bushels except grain sorghums in 1,000 cwt.)

1/ Carlot receipts have been converted to bushels on the basis that 1 carlot equals 1,750 bushels.

2/ Of the January receipts, 800 bushels were Black, 1,750 Green, and the remainder Yellow soybeans. Inspections of soybeans in January included 5,049,652 bushels as cargo lots, 2,097,630 bushels as truck receipts, and the balance as carlot receipts.

Based on reports of inspections by licensed grain inspectors at all markets

## GRAIN MARKETS SHOW MIXED TREND

Cash grain markets showed a mixed price trend in continued slow trading during the week ended February 26. Wheat and rye were firm, but flaxseed lost ground. Prices of other grains drifted within narrow bounds.

Winter wheat closed 3-4¢ per bushel higher in Chicago and finished in a firm position at most other markets. Strength was due largely to reports of mosaic damage in Kansas and drouth in parts of Kansas, Oklahoma and Texas. Offerings were generally ample for domestic and export demand. Firmness in Spring and Durum wheat stemmed mainly from good demand for light offerings. White wheat held steady as the lack of new export sales was offset by tight supplies of "free" wheat. Rye, bolstered by ready outlets for light receipts and strength in wheat, firmed up at Minneapolis.

Corn, oats, barley and grain sorghums fluctuated slightly this week but closed with little or no change in prices. Trading in feed grains was light, reflecting in part the influence of lower support rates for 1959 crops. Day-to-day price changes were largely a matter of supply and demand conditions at individual markets.

Strength in soybeans reflected continued light offerings and improved meal and oil markets. Crushers lowered bids on flaxseed and prices finished 5¢ per bushel lower at Minneapolis.

CORN BARTER AGREEMENT: The USDA entered into a barter agreement on February 10, 1959, with an American exporter which provides for \$10 million worth of corn (about 8 million bushels) to be exported to Belgium in exchange for industrial diamonds. Corn is to be used for industrial purposes only and not for feed. The quantity of corn in this agreement is in addition to the amount normally purchased by Belgium manufacturers for dollars from the United States for industrial use.

GRAINS UNDER PRICE SUPPORT SUPPLEMENT: A more complete report on quantities of 1958-crop grains put under price-support loans and purchase agreements through January was issued February 26. (See table on page 12) Corn data has been excluded from this special report, however, since price supports for this crop will be available through May.

PRICE SUPPORT FOR 1959-CROP OATS AND CORN: Eligibility of 1959-crop oats and corn for loans and purchase agreements under the price-support program will be based on revised grade standards even though these standards do not take effect until June 1 for oats and October 1 for corn. Support eligibility requirements for oats will be extended to include oats or garlicky oats grading No. 4 because of test weight only at a discount of 1¢ per bushel from the basic county support rate for oats grading No. 3. Other eligibility requirements and premiums and discounts for oats under the 1959 program will be unchanged from the 1958 program. No changes are being made in 1959-crop corn price-support eligibility requirements (except as these requirements are modified by the revised grade standards for corn).

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats, or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

**COMMODITY CREDIT CORPORATION INVENTORY AND SALES**

(All data in 1,000 bushels except grain sorghums in 1,000 cwt.)

Estimated CCC non-committed inventory for week ended February 18, 1959

## GRAIN MARKETS MIXED

Cash grain markets continued to show a mixed trend during the week ended March 5. Winter wheat prices climbed to or near new crop-year highs, but Spring, Durum and White wheat turned easier. Corn and grain sorghums strengthened, while other feed grains weakened. Soybeans firmed up.

Winter wheat, influenced by improved domestic and export demand and the recent upward revision in the amount of wheat under price support, closed 1-6¢ per bushel higher. Spring wheat slipped 2-3¢ at Minneapolis. The trade attributed some of the weakness to government offers of "rather substantial amounts of Spring wheat for unrestricted use." Sales of CCC wheat, however, were small. Durum wheat declined on increased offerings and partly in sympathy with Spring wheat. White wheat slipped in slow trading at Portland where buyers reduced offering prices in the face of small supplies and active export trade. Rye drifted slightly lower at Minneapolis.

Corn and grain sorghums finished in a stronger position this week, reflecting generally good demand. Offerings of corn were a little larger, but supplies of grain sorghums were on the tight side. Oats and barley closed unchanged to slightly lower at most markets, with not much demand or trading. However, Malting barley was off 4-6¢ at Minneapolis.

Soybeans edged upward 2-3¢ per bushel, strengthened by continued light receipts, the higher meal market, and the recent announcement that about 137 million bushels were under price support. The advance lifted producer prices close to the \$2.15 per bushel loan levels in major Illinois producing areas. Flaxseed held unchanged in dull trading at Minneapolis.

**WHEAT PRICE SUPPORT RATES:** Minimum 1959-crop wheat price-support rates have been set for terminals and for 2,843 commercial and 229 noncommercial wheat-producing counties. County rates, which range from \$2.12 to 85¢ (noncommercial) per bushel, depending on location, are further adjusted up or down for grade and quality to determine support prices for individual producers. Rates are based on the minimum national average wheat support price of \$1.81 per bushel for 1959 production. A list of premiums and discounts for different classes and qualities of wheat also was announced. Most premiums and discounts for 1959-crop wheat support are the same as those in 1958. The discount of 2¢ per bushel on Western Red and White wheat classes is being eliminated. This discount did not apply to Baart and Bluestem varieties. A discount of 20¢ per bushel for undesirable varieties of wheat is being continued in the 1959 wheat support program. This discount applies to 33 varieties designated as undesirable because of inferior milling or baking qualities.

**SALES POLICY FOR CCC-OWNED FLAXSEED:** A pricing policy covering sales of CCC-owned flaxseed from April 1 through July 31, 1959, has been announced. Sales for domestic crushing or export will be made at market price, but not less than 1958 support prices for No. 1 and 2 grades of flaxseed. This sales policy will apply during the 4-month period to flaxseed already taken over under the price-support program in California and Arizona and any flaxseed which may be taken over after the March 31, 1959, maturity date for loans in other producing areas.

**BARTER AGREEMENT WITH INDIA:** A basic agreement has been reached between India and the United States regarding the exchange of 450,000 metric tons or more of CCC-owned foodstuffs, principally wheat, for manganese, ferromanganese, and other materials originating in India or processed from materials originating in India. Processing may take place within India or in friendly countries outside India, including the United States. Operational details are expected to be completed in the near future.

Average prices received by farmers, effective parity, and support rates  
(Dollars per bushel except grain sorghums per cwt.)

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats, or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

**COMMODITY CREDIT CORPORATION INVENTORY AND SALES**

(All data in 1,000 bushels except grain sorghums in 1,000 cwt.)

NOTE: Data are based on weekly reports of inspections for export by licensed grain inspectors and do not include rail or truck movement to Canada or Mexico. In some cases the ultimate destination of the grain exported is not shown on the inspection reports, therefore, the quantity of each country may vary from official Census data which are based on custom declarations.

**GRAINS: Inspections for export by ports and lake shipments to Canada**

The above rates for wheat and flour shall serve as the export allowances to be used in establishing prices for CCC wheat for export under Announcements GR-261 and GR-262 (Barter), except that the export rate period expiration date does not apply to the GR-261 and GR-262 programs. For the class "Mixed Wheat" on all coasts, the respective rates for the classes comprising the mixture will apply.

1/ The West Coast wheat rate for the export period July 26 through August 14, 1959, is applicable to sales for shipment from California ports during the period June 1 through August 14, 1959.

## GRAIN MARKETS LITTLE CHANGED

Spring wheat continued to weaken but other cash grains showed little or no change during the week ended March 12.

Winter wheat, influenced mainly by the quantity under price support, firmed up at Kansas City, but closed on the weak side at Fort Worth and Chicago despite fairly active mill demand on export flour orders. Spring wheat was under pressure from small flour sales, lack of storage facilities at Minneapolis, and sales by CCC. As a result, prices went down 2-4¢ per bushel. Durum wheat prices softened despite lighter receipts and improved demand. White wheat strengthened at Portland as export flour sales stimulated demand for continued light country marketings. Rye held steady at Minneapolis in spite of heavier receipts.

Offerings of corn were light at cash markets as snow blocked many Corn Belt roads and gave some urgency to spot demand. Oats strengthened with good demand for light offerings of better grades, while barley was generally unchanged in dull trading. Grain sorghums also were about unchanged with light offerings and demand.

Oilseeds - soybeans and flaxseed - held practically steady all week.

AUSTRALIA WHEAT PLAN: Australia's new 5-year wheat stabilization plan became effective December 1, 1958, according to the Foreign Agricultural Service. It is similar to the previous 5-year plan and provides that the Australian Wheat Board remain in complete control of wheat marketing for the next 5 years. Growers may sell only to the Board, which sells for domestic consumption at fixed prices. Wheat is exported to International Wheat Agreement countries in conformity with current IWA export prices and to other countries at the best price obtainable.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

**COMMODITY CREDIT CORPORATION INVENTORY AND SALES**  
(All data in 1,000 bushels except grain sorghums in 1,000 cwt.)

March 20, 1959

## GRAIN MARKETS CONTINUE ABOUT UNCHANGED

Cash grain markets fluctuated within a narrow range and prices generally showed little or no change during the week ended March 19. Trading was slow with receipts light. An increase in acreage for 1959 - 12 percent for corn, 9 percent for spring wheat, and 5 percent for barley - was generally expected and had little market influence.

Winter wheat declined 1-2¢ per bushel with slow export demand and limited domestic buying. Light receipts of spring wheat advanced prices 1-2¢ although mills reported only scattered sales of flour. White wheat markets continued slow due to a lack of export trade in wheat and prices were about unchanged. Rye fluctuated during the week and closed 1¢ lower at Minneapolis.

Feed grain markets were little changed with offerings fairly well balanced with demand. Country offerings of corn continued light with a fair demand from feeders and exporters. High-quality oats sold readily while barley markets were mostly slow and unchanged. Grain sorghums were also about unchanged with light offerings and demand.

Soybean markets weakened despite large quantities remaining under support. Country offerings continued light. Only small interest was shown in the flaxseed market and prices finished unchanged at Minneapolis.

"FREE" WHEAT SUPPLIES: On the first of March around 582 million bushels of wheat were outstanding under support or under resale, as against 251 million a year earlier. In addition, the CCC non-committed inventory totaled 733 million or about 30 million more than a year ago. Deducting exports, millings and farm use from domestic supplies leaves around 1,626 million bushels on March 1, compared with 1,179 million on March 1, 1958. On this basis, "free" supplies of wheat at the first of March totaled 310 million this year as against 224 million last year.

PROSPECTIVE PLANTINGS: Crop plantings for 1959 now seem likely to be about 2 percent above the low levels of the past two years, but about 5 percent below the early 1950's. Corn acreage may exceed last year by over 9 million acres - over 12 percent for the largest planted acreage since 1949. Intentions for planting oats are down 6 percent and sorghums 3 percent from 1958, but barley plantings are up about 5 percent. Soybean acreage, after nine years of expansion, may drop 7 percent from last year's record high. Spring wheat plantings are 9 percent above 1958

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats, or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

**COMMODITY CREDIT CORPORATION INVENTORY AND SALES**  
(All data in 1,000 bushels except grain sorghums in 1,000 cwt.)

1/ Carlot receipts have been converted to bushels on the basis that 1 carlot equals 1,750 bushels.

2/ Of the February receipts, 400 bushels were Black, and the remainder Yellow soybeans. Inspections of soybeans in February included 2,794,745 bushels as cargo lots, 1,480,153 bushels as truck receipts, and the balance as carlot receipts.

Based on reports of inspections by licensed grain inspectors at all markets.

Corn: Inspected carlot receipts by grades at selected markets,

1/ From reports of grain inspections by licensed grain inspectors. Includes only officially inspected truck receipts and shipments but does not include any carlot movement. There also may be some duplication in inspections.

2/ Cargo shipments at these points are practically all inspections for export.

1/ No program.

The total of 302 million bushels of 1958-crop corn under support is larger than the quantities put under from the 1957 crop a year earlier but smaller than those from the 1956 crop two years ago. Of the corn under support through February, about 41 percent or 125 million bushels were from farms not in compliance with 1958 acreage allotments. Non-compliance corn under support for the principal States in million bushels was: Iowa 53.6; Minnesota 19.4; Nebraska 22.3; Illinois 11.6; South Dakota 5.2; Indiana 4.8; Missouri 3.0; Ohio 1.7; Kansas 1.6; and Michigan 1.0. Deliveries of 1958 grain to CCC through February include 4,845 bushels of barley, 581,526 flaxseed, 18,858 oats, 2,976 rye, 468,981 wheat, and 89,963 cwt. of grain sorghums.

## GRAIN MARKETS STRENGTHEN ON LIGHT OFFERINGS

Cash grain markets closed unchanged to slightly higher for the week ended March 26. Strength stemmed largely from light offerings, but pre-holiday trading was slow.

Winter wheat finished unchanged to 6¢ per bushel higher, influenced by light country marketings and fairly good export bookings of wheat and flour. Closing prices stood at or near new highs for the season at several points. Spring wheat firmed up behind light receipts and some export business at Minneapolis, but Durum wheat weakened slightly as light receipts met limited demand. White wheat prices softened at Portland with limited export demand. Rye went up 3¢ at Minneapolis, reflecting lighter receipts and strength in futures.

Cash corn closed unchanged to 3¢ per bushel higher as fairly good demand from the domestic feed trade and exporters readily absorbed light country marketings. Oats and barley prices fluctuated within a narrow range but finished a little firmer. Demand improved but trading was slowed to some extent by limited offerings. Grain sorghums edged forward 2-3¢ per cwt. with good demand for light offerings.

Soybean offerings were not large and demand was not pressing but the market was influenced by strength in meal and prices closed firm. Movement of flaxseed to Minneapolis came almost to a standstill but demand lagged and prices remained unchanged.

---

### Special Features

| Grains - United States imports.....                          | 7           |
| Soybean and flaxseed - supply and distribution, monthly..... | 7           |

CANADIAN GRAIN ACREAGE: The Canadian Dominion Bureau of Statistics reports intended grain acreages for 1959 as of March 1, with 1958 acreage in parentheses, as follows: wheat 22,744,000 (20,899,100); oats 11,408,800 (11,039,200); barley 8,988,200 (9,548,000); rye 525,900 (521,400); flaxseed 2,682,300 (2,664,700); corn for grain 493,500 (498,500); and soybeans 233,000 (263,000).

IWA SALES: Sales of wheat and flour under the International Wheat Agreement program totaled 1,026,000 bushels during the week ended March 24. This brought sales for the season to date to 69.8 million bushels compared with 80.9 million a year earlier. Balance remaining for sale under the quota this season is 58.9 million bushels as against 47.6 million a year ago.

SOYBEANS: World production of soybeans in 1958 is estimated at 984 million bushels by the Foreign Agricultural Service. Production set a record for the fifth consecutive year, exceeding the previous peak in 1957 by 12 percent and the 1950-54 average by 44 percent. The sharp increase in U. S. production accounts for about 85 percent of the estimated 105 million bushel increase from 1957 in world output. However, production in Mainland China is believed to have risen somewhat, and crops in most of the relatively minor producing countries, with the exception of Japan, Nigeria and Thailand, either equaled or exceeded the previous year's level. The U. S. bumper crop in 1958 was the result of both a record acreage and a record yield per acre.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats, or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

**COMMODITY CREDIT CORPORATION INVENTORY AND SALES**  
(All data in 1,000 bushels except grain sorghums in 1,000 cwt.)

Estimated CCC non-committed inventory for week ended March 20, 1959

## CORN AND SORGHUMS ADVANCE - OTHER GRAINS MOSTLY FIRM

Corn and grain sorghum prices advanced and most other cash grains held firm during the week ended April 2. Light country marketings and fairly active domestic and export demand were the principal strengthening influences. Trading, however, was generally limited.

Firmness in Winter wheat reflected light country selling, small redemptions under the loan program, good mill and fair export demand, and to some extent the lack of moisture in producing areas. Spring wheat showed weakness at Minneapolis where flour trade remained slow. Durum wheat, however, was unchanged. White wheat was about unchanged at Portland, with very limited export trade and small country offerings. Rye weakened at Minneapolis.

Corn advanced 5-8¢ per bushel at principal markets as offerings failed to satisfy the good demand. Trade reports indicate that although plenty of corn is in the country, farmers are holding it while awaiting further market developments. Oats and barley held about steady as light offerings limited trading. Advances of 4-6¢ per cwt. on grain sorghums carried prices to crop-year highs in the Southwest. Competition for light offerings was active as buyers were covering sales to domestic mills and the export trade.

Soybeans finished in a firm position as offerings were light and crusher bidding was encouraged by stronger meal prices and anticipated stepped-up demand from Canada and the export trade with the opening of the St. Lawrence Seaway. Flaxseed was unchanged in quiet trading at Minneapolis.

GRAIN SORGHUM LOANS: Farmers will be able to extend price-support loans on farm-stored 1957-crop grain sorghums now under resale for another year following the March 31, 1959, maturity date for these resale loans. About 1.7 million cwt. of farm-stored 1957-crop grain sorghums are now resealed under extended price-support loans. Extension of resale will be made available in areas determined by State ASC Committees. Action broadening the resale program is to help relieve the storage situation in specific areas.

CRUSHING PROGRAM FOR CCC-OWNED FLAXSEED: A crushing program for CCC-owned flaxseed to help relieve the tight grain storage situation in the northern Great Plains area will begin in April. Processors will submit competitive bids (1) offering CCC linseed oil and (2) offering CCC both linseed oil and linseed meal. Processors will purchase CCC-owned flaxseed at support price. Within a limited period, processors will deliver to CCC a quantity of linseed oil equivalent to flaxseed purchased (20 pounds of oil per bushel of flaxseed), or the linseed oil and meal, depending upon the bids accepted by CCC. CCC's buying price for the linseed oil or the linseed oil and meal will be each processor's successful bid price.

RATES ON CCC CERTIFICATES OF INTEREST: The rate of interest payable on certificates of interest issued by CCC to banks and other financial institutions for financing 1958-crop price support loans will be increased from 2 1/2 to 2 3/4 percent per annum beginning May 1, 1959. Notices authorizing the increased rate of interest will be published in the Federal Register. This change in the interest rate payable to financial institutions does not affect the rate of interest charged to producers on 1958-crop price support loans.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats, or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

# COMMODITY CREDIT CORPORATION INVENTORY AND SALES

(All data in 1,000 bushels except grain sorghums in 1,000 cwt.)

NOTE: Data are based on weekly reports of inspections for export by licensed grain inspectors and do not include rail or truck movement to Canada or Mexico. In some cases the ultimate destination of the grain exported is not shown on the inspection reports, therefore, the quantity of each country may vary from official Census data which are based on custom declarations.

## GRAIN MARKETS FIRM

Grain sorghum prices advanced to new crop-year highs and most other cash grains were firm during the week ended April 9. The market was supported mainly by continued light country marketings and fairly active demand. Trading, however, generally remained limited.

Hard Winter and Spring wheat strengthened, but Soft Winter wheat weakened. Good mill demand for light offerings of Hard and Spring wheat resulted in a temporary tight supply situation at principal terminal markets, while demand for Soft Winter wheat slackened. Durum wheat was unchanged at Minneapolis. White wheat also held about steady at Portland where country marketings were light and new export trade was disappointing. Rye closed weaker at Minneapolis after holding firm most of the week.

Firmness in feed grains was attributed mostly to light marketings in the country and good domestic and export demand. Strength in corn carried prices to or near the high point of the season at several markets. Trading in oats and barley was hampered to some extent by the lack of offerings. Oats closed firm and barley averaged about unchanged except for a 2-6¢ per bushel advance in Malting barley at Minneapolis. Grain sorghums advanced 4-7¢ per cwt. at Kansas City and 2-3¢ at Fort Worth. Offerings fell short of good demand as country stocks were held in firm hands.

Soybeans held firm throughout the week as farmers continued to hold back their beans and crushers offered good demand. Flaxseed was unchanged in dull trading at Minneapolis.

GRAIN EXPORTS: Grain exports are running well above last season on the basis of current boat loadings and reports of exports through February. Exports of wheat and flour during March totaled around 44 million bushels, 10 million more than during March 1958. Exports, July through March, at 325 million this season are 34 million above the same months last season. Corn exports, estimated at 17 million during March, now total 105 million for the first half of the season as against 102 million for the first half of 1957-58. March exports of barley at 6.5 million bushels brought the total for the first nine months to nearly 90 million as against 56 million the same months last season. Exports of around 52 million bushels of grain sorghums the first half of the season are about three times the quantity exported the first half of 1957-58. Soybean exports continue above last season with the 6-month total nearly 61 million bushels as against 54 million last season. Exports of 22 million bushels of oats and 8 million bushels of rye the first nine months of the season were both well above a year earlier.

IWA SALES: Sales of wheat and flour under the International Wheat Agreement totaled 912,000 bushels during the week ended April 7. This brought sales for the season to date to 71.3 million bushels compared with 81.7 million a year earlier. Balance remaining for sale under the quota this season is 57.4 million bushels as against 46.8 million a year ago.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats, or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

**COMMODITY CREDIT CORPORATION INVENTORY AND SALES**  
(All data in 1,000 bushels except grain sorghums in 1,000 cwt.)

## WINTER WHEAT MARKET DOWN

Winter wheat prices lost ground during the week ended April 16, while most other cash grains showed little or no change.

Winter wheat, influenced mainly by improved crop prospects and a drop in futures prices, closed 3-8¢ per bushel lower at principal markets. Moderate offerings proved about adequate for fairly good domestic and export demand. Spring wheat, on the other hand, finished 2¢ higher at Minneapolis as light receipts were readily cleaned up by mills and order buyers covering recent flour sales and expected export business. Durum wheat, however, weakened with little interest shown for light offerings. White wheat firmed up at Portland as country offerings remained light and export trade became more active. Rye weakened in spite of smaller receipts at Minneapolis.

Corn prices fluctuated within a narrow range and closed about unchanged. Selling and receipts increased slightly but demand remained rather strong. Much of the trade expressed an opinion that marketings would increase steadily with good weather as road conditions improved and spring plowing and planting are completed. Oats and barley prices also closed about unchanged for the week as light offerings about matched current demand. Grain sorghums advanced 2-5¢ per cwt. to new crop-year highs as limited offerings continued to find good domestic and export demand.

Strength in soybeans was attributed mainly to continued light offerings since demand for meal slowed and prices weakened. Flaxseed, influenced by export demand at Duluth, advanced 5¢ per bushel at Minneapolis.

WINTER WHEAT PROSPECTS: The April 1 forecast of winter wheat production called for a 1959 crop of 966 million bushels. This is 18 percent below the record production of 1.2 billion bushels in 1958. If realized, however, it still will be the fifth largest crop ever produced as well as 19 percent above the 1948-57 average of 815 million bushels. The condition of rye was 84 percent of normal on April 1, 4 points below a year earlier and 1 point below average.

REVISED MIXED GRAIN STANDARDS: A revision of the Official Grain Standards of the United States for Mixed Grain will become effective August 1, 1959. The revision permits certain mixtures of oats and wild oats, which heretofore have been graded as feed oats and mixed feed oats and which will not come within requirements of the revised oats standards, to be graded as mixed grain. Standards for feed oats and mixed feed oats will be canceled June 1.

GRAIN MOISTURE CHART CHANGED: A revised conversion chart will be used, starting June 15, 1959, with the Weston Moisture Meter for Grain in determining the moisture content of all soft red winter and of white wheat grown in eastern areas of the United States. This meter is an electrical device commonly used in routine inspection of grain. Experience with soft red winter and white wheat (eastern production) crops indicates that the chart currently in use underestimates moisture content. Accordingly, the new chart will yield moisture values which are 0.4 percent higher than those estimated with the former chart. Moisture meter conversion charts are based on the prescribed oven methods for determining moisture.

IWA SALES: Sales of wheat and flour under the International Wheat Agreement Program totaled 837,000 bushels during the week ended April 14. This brought sales for the season to date to 72.1 million bushels compared with 83.3 million a year earlier. Balance remaining for sale under the quota this season is 56.6 million bushels as against 45.2 million a year ago.

Feed grain payment-in-kind export bids, April 10-16, 1959

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats, or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

**COMMODITY CREDIT CORPORATION INVENTORY AND SALES**  
(All data in 1,000 bushels except grain sorghums in 1,000 cwt.)

The above rates for wheat and flour shall serve as the export allowances to be used in establishing prices for CCC wheat for export under Announcements GR-261 and GR-262 (Barter), except that the export rate period expiration date does not apply to the GR-261 and GR-262 programs. For the class "Mixed Wheat" on all coasts, the respective rates for the classes comprising the mixture will apply.

1/ The West Coast wheat rate for the export period July 26 through August 14, 1959, is applicable to sales for shipment from California ports during the period June 1 through August 14, 1959.

## GRAIN MARKETS LITTLE CHANGED

Cash grain prices drifted within narrow bounds during the week ended April 23. Corn, grain sorghums and soybeans finished a little firmer, but other grains closed unchanged or slightly weaker.

Winter and Spring wheat prices softened in spite of relatively light offerings as demand sagged. Export interest was far from active and needs of domestic mills were fairly well covered until the new crop comes in. Durum wheat held steady on light receipts. White wheat, supported by light offerings and slightly improved demand, was unchanged at Portland. Rye weakened at Minneapolis.

Firmness in the corn market reflected continued light marketings and good demand from feed mills and exporters. Oats and barley prices were unchanged to weaker in quiet trading at most markets. However, barley firmed up slightly at San Francisco and Kansas City. Grain sorghum prices edged up 3-4¢ per cwt. as small offerings fell short of good demand. Closing prices again established new crop-year highs.

Soybeans drew support from the holding tendency on the part of producers and the large volume under loan and closed 2-3¢ per bushel higher. Flaxseed was unchanged in dull trading at Minneapolis.

PRICE SUPPORT: Farmers put 332.8 million bushels of 1958-crop corn under price support through March 31. This compares with 301.8 million from the 1957 crop through April 15, 1958. Of the quantity put under support this season, 137.8 million were from farms not in compliance with 1958 acreage allotments. Details of price support operations on all grains by States are shown on pages 11-18.

CANADIAN GRAIN: Stocks of Canadian wheat on March 31 totaled 706.8 million bushels, according to the Dominion Bureau of Statistics. This is 109 million below a year ago and nearly 200 million below the record high two years ago. Stocks of other grains in million bushels on March 31 this year with comparable figures for last year in parentheses, were as follows: Barley 201 (217); oats 244 (311); rye 11.8 (16.4); and flaxseed 13.3 (13.0).

SOYBEAN AND FLAXSEED CRUSHINGS: Soybean crushings in March totaled 36.0 million bushels compared with 34.0 in February and 30.9 million in March 1958. Crushings the first half of the season now total 208.1 million bushels as against 174.8 million the first half of last season. Crushings of 1.9 million bushels of flaxseed in March brought the total since July 1 to 18.2 million as against 22.7 million the same months last season.

IWA SALES: Sales of wheat and flour under the International Wheat Agreement Program during the week ended April 21 totaled 2,662,000 bushels. This brought sales for the season to date to 74.8 million bushels compared with 83.9 million a year earlier. Balance remaining for sale under the quota this season is 53.9 million bushels as against 44.6 million a year ago.

Feed grain payment-in-kind export bids, April 17-23, 1959  
(All data in bushels except grain sorghums in cwt.)

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats, or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Bar and Bluestem of the sub-class Hard White.

# COMMODITY CREDIT CORPORATION INVENTORY AND SALES

(All data in 1,000 bushels except grain sorghums in 1,000 cwt.)

1/ Estimates of the Crop Reporting Board.

2/ Commercial stocks reported by Grain Division, AMS, at 44 Terminal cities.

3/ Owned by CCC and stored in bins or other storages owned or controlled by CCC; other CCC-owned grain is included in the estimates by positions.

4/ All off-farm storages not otherwise designated, including merchant mills.

5/ Not available for April 1 prior to 1957.

6/ Firms reporting crushings and stocks of soybeans to the Bureau of the Census.

Wheat: CCC-owned stocks, March 31, 1959, by position

1/ Carlot receipts have been converted to bushels on the basis that 1 carlot equals 1,750 bushels.

2/ Of the March receipts, 400 bushels were Black, and the remainder Yellow soybeans. Inspections of soybeans in March included 4,523,992 bushels as cargo lots, 1,537,491 bushels as truck receipts, and the balance as carlot receipts.

Based on reports of inspections by licensed grain inspectors at all markets.

QUARTERLY  
SUMMARY  
AND  
STATISTICS

GRAIN DIVISION

AGRICULTURAL MARKETING SERVICE

UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 2 No. 2

Washington 25, D. C.

April 28, 1959

Grain markets were generally steady to firm the first four months of 1959. Corn, grain sorghums and soybeans showed the most strength. Wheat prices most of the time averaged around 18¢ per bushel below a year earlier, but Winter wheat, influenced by prospects for another large crop, weakened further near the end of April. Corn which in January was 5-10¢ under a year earlier strengthened during April and at the end of the month was about on a par with a year ago. Barley, grain sorghums and soybeans were somewhat higher than a year earlier, but oats and rye averaged lower. Flaxseed advanced during April and finished about the same as a year ago.

Wheat prices at the end of April ranged from 14-30¢ per bushel below a year ago. Prices were generally 10-12¢ below the effective support rate except for high protein and Durum wheat in the Midwest and White wheat in the Pacific Northwest. Fifteen percent protein Spring wheat sold 14¢ per bushel above ordinary protein in April. A year ago, the premium was only 3¢. Stocks of wheat in all positions April 1 totaled a record 1.5 billion bushels, more than a third larger than a year earlier. Of the total stocks, the Commodity Credit Corporation owned 745 million bushels. An additional 559 million were outstanding under support or resale, leaving around 236 million bushels of "free" wheat as against 188 million a year ago. Of the total CCC-owned stocks, 543 million were Hard Winter, 156 million Hard Spring, 3 million Soft Winter, 28 million White, 13 million Durum and 2 million mixed. A little over 325 million bushels of wheat and flour were exported the first 9 months, an increase of 34 million over the same months last year. Flour millings of 436 million were the largest since 1948-49 and about 8 million above a year earlier. April 1 wheat supplies for export or carryover in the United States, Canada, Argentina and Australia totaled 2.3 billion bushels as against 1.9 billion a year ago. Canadian supplies were down nearly 100 million bushels, but Australian supplies were up nearly 60 million. Supplies in Argentina were about the same.

Rye averaged 3¢ per bushel lower this April than a year earlier. Cash prices were around 6¢ below the effective support level at Minneapolis. Rye stocks, 18.2 million bushels on April 1, were about 3 million larger than a year ago. Disappearance of 27.3 million bushels July-March was 5.4 million more than last year. Exports of 8.3 million were more than double those of last year while usage for alcohol and feed were both above last year. Millings for flour continue to decrease with this year's total the smallest of record.

Corn prices advanced sharply early in April and were mostly steady the remainder of the month, reflecting smaller marketings and continued heavy exports. Record April 1 corn stocks of nearly 3.0 billion bushels were 184 million above a year ago. CCC owned 1.1 billion bushels of the total stocks, with an additional 462 million under loan or resale. Disappearance of corn as grain during

the first half of the season totaled 1.9 billion bushels -- 236 million more than a year earlier and the largest for the period since 1943. Record exports of 105 million are 3 million above last year. Other commercial use continued high with wet milling and alcohol use each up by around 3 million bushels. Corn feeding was at near-record levels with grain consuming animal units of 171.8 million, up 10 million from a year earlier. Corn as grain fed per animal unit totaled 10.0 bushels the first half as against 9.3 last year and 9.1 the 5-year average.

Oats prices during April averaged around 3¢ per bushel below April 1958 reflecting in part the record stocks. April 1 stocks totaled 667 million bushels-- nearly 12 percent above a year earlier. Disappearance, mainly for feed, totaled 1,034 million bushels the first 9 months of the season, 71 million above last year. Exports of 22.3 million bushels were up sharply, while imports of 2.8 million were down sharply from the 18.5 million a year earlier.

Barley generally averaged around 9¢ per bushel higher this April than a year earlier due mainly to record exports and continued heavy feeding. Malting barley, however, was 6¢ lower. Record barley stocks of 288 million on April 1 were 25 million above a year ago. Of this year's stocks, CCC owned 70 million with 104 million outstanding under support. Barley disappearance, 359 million bushels during July-March, was 41 million above last year and the largest of record. Record exports of 90 million were 34 million above last year while imports of 8 million were only half. Industrial usage of 59 million was about average but feeding of 192 million was the second largest since 1943.

Grain sorghum prices advanced to season's high in April and at the close averaged 10¢ per cwt. above a year ago. April 1 stocks of 343 million cwt. were 105 million above a year ago. Of this year's total, CCC owned 155 million cwt. and had 150 million outstanding under support. Disappearance totaled 175 million the first half of the season, an increase of 52 million over last season. Exports of 29 million are three times those of a year ago while feeding was up sharply.

Soybean prices have been advancing gradually and at the end of April were at about last year's level. Record soybean stocks of 323 million were 67 million above a year earlier. Of this year's total, CCC owned 10 million with 133 million outstanding under support. Exports of nearly 61 million bushels were up nearly 7 million while crushings the first 6 months of 208 million were 33 million higher.

Flaxseed at the end of April averaged \$3.00 per bushel at Minneapolis or about the same as a year earlier. January 1 stocks totaled 24 million bushels, or 9 million more than a year earlier. Only a small portion was owned by CCC, but over 14 million bushels were outstanding under support. Flaxseed crushings totaled 18 million the first 9 months as against 23 million a year earlier. Exports of 4.6 million were sharply below last year's total of 9 million.

Source: Data on stocks, production and seed usage from Crop Reporting Board; imports, exports, and quantity of wheat, rye soybeans and flaxseed processed from Census Bureau; and alcohol usage from Internal Revenue Service. January-March 1959 data partly estimated.

**GRAINS: AVERAGE CASH PRICES, FARM PRICES AND SUPPORT PRICES**

(All prices in cents per bushel except grain sorghums in cents per cwt.)

1/ Owned and stored in bins or other storage owned or controlled by CCC. Additional CCC-owned grain is included in other positions.

2/ All off-farm storages not otherwise designated, including merchant mills.

3/ Does not include Canadian wheat milled in bond but includes about 10,000,000 bushels of wheat used annually for breakfast food.

4/ Mostly quantity fed, but includes industrial use, waste, loss and statistical errors in estimates.

Rye: Supply and distribution, 1952-59

1/ Owned and stored in bins or other storage owned or controlled by CCC.

Additional CCC-owned grain is included in other positions.

2/ All off-farm storages not otherwise designated, including merchant mills.

3/ Mostly quantity fed, but includes oats for oatmeal currently estimated at 37 million bushels annually. Also includes waste, loss, and statistical errors in estimates.

Barley: Supply and distribution, 1952-59

1/ Owned and stored in bins or other storage owned or controlled by CCC.  
Additional CCC-owned grain is included in other positions.

2/ All off-farm storages not otherwise designated, including merchant mills.

3/ Used for brewing, distilling, malt products, and pearling.

4/ Mostly quantity fed, but includes waste, loss, and statistical errors in estimates.

Grain sorghums: Supply and distribution, 1956-59

- 1/ October 1 stocks in all positions include only old-crop soybeans.
- 2/ Owned and stored in bins or other storage owned or controlled by CCC. Additional CCC-owned grain is included in other positions.
- 3/ All off-farm storages not otherwise designated.
- 4/ Exports minus imports which are negligible.
- 5/ Mostly quantity fed, but includes waste, loss and statistical errors in estimates.

Flaxseed: Supply and distribution, 1952-59

1/ Quantity of current crop placed under support minus the quantity of loans re-paid and delivered. Data for April 1, 1958, estimated to be the midpoint between the quantity on March 15, 1958 and April 15, 1958.

2/ Quantity of previous crops under reseal, extended reseal, or re-extended reseal.

3/ Total grain in all positions as reported by Agricultural Estimates Division, AMS.

## GRAIN MARKETS MIXED

Cash grain prices showed a mixed trend during the week ended April 30. Wheat led the decline, followed by grain sorghums and corn. Oats, barley, soybeans and flaxseed held about steady, but rye strengthened.

Winter and Spring wheat prices weakened further, with substantial losses in Soft Red Winter at Chicago, St. Louis and Toledo. Trading was light as demand was rather limited in view of large stocks of wheat in all positions and trade anticipation that June 30 "free" supplies will be larger than a year earlier. Durum wheat, however, strengthened with active competition for small daily offerings. White wheat also strengthened on scant offerings at Portland. Rye finished 4¢ per bushel higher at Minneapolis.

Corn markets generally weakened as country prices were slightly above the "low" loan level and marketings increased. Both domestic and export demand, however, remained fairly strong. Oats and barley prices fluctuated within a narrow range in light trading but finished about unchanged for the week. Grain sorghum prices went down 3-5¢ per cwt. Some of the decline was due to an adjustment to bring sorghum prices more in line with corn prices. Demand was more or less limited despite light offerings.

Weakness in soybeans generally reflected the lower trend in the futures market for meal. However, this was partly offset by light marketings and prospects for a continued heavy crush. Flaxseed held unchanged at Minneapolis with not too much demand from either crushers or exporters.

EXPORTS: Nearly 37.2 million bushels of wheat were exported in March, or 10.2 million more than a year earlier. This brought exports for the season, July-March, to almost 266.6 million bushels compared with nearly 235.5 million the same period last year. Exports of oats, 2.1 million in March and 21.4 million for the season, were well ahead of the same time a year earlier. Other major exports in March included 7.4 million bushels of barley, 13.5 million corn, 7.3 million grain sorghums and 5.0 million soybeans. Barley exports were slightly under a year earlier, but exports of corn, grain sorghums and soybeans were considerably larger.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats, or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

# COMMODITY CREDIT CORPORATION INVENTORY AND SALES

(All data in 1,000 bushels except grain sorghums in 1,000 cwt.)

## GRAIN MARKETS REMAIN MIXED

Cash grain prices continued to show a mixed trend during the week ended May 7. Wheat, oats, barley, soybeans and flaxseed generally held firm, while corn, grain sorghums and rye weakened.

Winter wheat held a firm position at most markets but weakened at Chicago and St. Louis. Country selling remained light, but offerings were generally ample for slow domestic and export demand. Most buyers showed little interest in purchasing beyond immediate needs. Spring wheat, influenced by light receipts and prospective export business, advanced 4-5¢ per bushel at Minneapolis, while Durum wheat held firm on very limited offerings. White wheat was unchanged at Portland as lagging export demand offset light supplies. Rye dropped 4-5¢ at Minneapolis.

Cash corn closed unchanged to slightly lower despite persistently good domestic and export demand. Oats finished strong and barley was unchanged except for a sharp drop in California. Demand was fairly active, but trading was generally limited by the lack of offerings. Grain sorghum finished a little lower with light demand.

Strength in soybeans stemmed mainly from continued light marketings and good processor demand. Flaxseed remained unchanged at Minneapolis with very little interest shown for limited offerings.

GRAIN SORGHUM PRICE SUPPORT RATES: County and terminal support rates have been announced for 1959-crop grain sorghums. Rates are based on the \$1.52 per cwt. national average support price for 1959-crop grain sorghums grading No. 2 or better. Method followed in determining individual county and terminal rates is the same as in previous years. However, there are changes in the relationships in support prices among terminals. Sharpest change is a decrease of 12¢ per cwt. in Midwest terminal rates in relation to Gulf terminal rates. County support rates in midwestern states also reflect this change. West Coast terminal support rates are being resumed for the 1959 support operation. Rates are 7¢ per cwt. lower in relation to Gulf terminal rates than those that would have been in effect for 1958 if terminal rates had been set for the West Coast.

IWA SALES: Sales of wheat and flour under the International Wheat Agreement Program during the week ended May 5 totaled 1,652,000 bushels. This brought sales for the season to date to 75.7 million bushels compared with 86.3 million a year earlier. Balance remaining for sale under the quota this season is 53.0 million bushels as against 42.2 million a year ago.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats, or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

# COMMODITY CREDIT CORPORATION INVENTORY AND SALES

(All data in 1,000 bushels except grain sorghums in 1,000 cwt.)

## CORN AND SORGHUMS UP - OTHER GRAINS WEAK

Corn and grain sorghum prices strengthened while other cash grains ruled unchanged to a little lower during the week ended May 14.

Weakness in winter wheat generally reflected the rapidly approaching new-crop harvest. Offerings were light, but so was domestic and export demand. Spring and durum wheat remained unchanged at Minneapolis as the strengthening influence of dry weather and dust storms in important producing states was about offset by larger receipts, quiet flour trading and the lack of export news. White wheat held firm at Portland as the market continued to draw support from limited "free" supplies. Export interest lagged. Rye finished a couple of cents under last week at Minneapolis.

Corn closed 1-4¢ per bushel higher at principal markets as relatively light offerings continued to find good demand from domestic feed mills and exporters. Oats were about unchanged in quiet trading, while barley ended up unchanged to 4¢ lower. Barley offerings were limited, but domestic and export demand was lacking. Grain sorghums advanced 4-6¢ per cwt. as light offerings found brisk domestic and export demand.

Soybeans closed about unchanged, with support stemming largely from continued light marketings and strength in the oil market. Flaxseed held steady at Minneapolis, with light buying interest from both crushers and exporters.

CROP PROSPECTS: May 1 conditions indicate a winter wheat crop of nearly 957 million bushels, one percent less than a month earlier, according to the Crop Reporting Board. Although prospects are 19 percent below the record 1958 crop of 1.2 billion bushels, the 1959-crop forecast is 17 percent above the 1948-57 average of 815 million bushels and still may be the fifth largest of record. Indicated yield of 23.5 bushels per acre is exceeded only by last year's record-smashing 28.4 bushels and compares with the average yield of 19.2 bushels. Rye conditions, at 84 percent of normal on May 1, were the same as a month earlier but eight points below a year ago and two points below average.

BARLEY PRICE SUPPORT RATES: County and terminal support rates have been announced for 1959-crop barley. Rates are based on the 1959-crop national average support price of 77¢ per bushel for Grade No. 2 or better barley. Method followed in determining county and terminal rates was the same as in previous years. Although the 1959 national average support price (77¢ per bushel) is 16¢ less than the 1958 national average support price (93¢ per bushel), many county and terminal rates reflect slightly differing amounts. This is due chiefly to changed transportation costs from producing areas to terminals and changed relationships between terminal market prices.

GRAIN MOISTURE CHART CHANGE POSTPONED: Use of a revised conversion chart for determining moisture content of soft red winter wheat and white wheat grown in eastern areas of the United States (reported in the April 17th issue of Grain Market News) has been postponed for at least a year. During the postponement, further studies will be made of the behavior of the two classes of eastern-grown wheat from the 1959 crop tested with the Weston Moisture Meter. Meanwhile, the chart which became effective for soft red winter wheat July 1, 1951, and for white wheat (eastern production) on August 1, 1955, will continue in use.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats, or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

**COMMODITY CREDIT CORPORATION INVENTORY AND SALES**  
(All data in 1,000 bushels except grain sorghums in 1,000 cwt.)

Estimated CCC non-committed inventory for week ended May 8, 1959

The above rates for wheat and flour shall serve as the export allowances to be used in establishing prices for CCC wheat for export under Announcements GR-261 and GR-262 (Barter), except that the export rate period expiration date does not apply to the GR-261 and GR-262 programs. For the class "Mixed Wheat" on all coasts, the respective rates for the classes comprising the mixture will apply.

1/ The West Coast wheat rate for the export period July 26 through August 14, 1959, is applicable to sales for shipment from California ports during the period June 1 through August 14, 1959.

UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 7    No. 20

Washington 25, D. C.

May 22, 1959

### GRAIN MARKETS MIXED

Cash grain markets were mixed during the week ended May 21. Wheat was stronger at some markets but weaker at others. Corn and grain sorghums strengthened, but soybeans, barley and rye weakened. Oats and flaxseed were generally unchanged.

Low-protein winter wheat finished a little weaker but high-protein wheat was stronger at Kansas City. Prices dropped 6¢ per bushel at Fort Worth, reflecting the initial marketing of 1959-crop winter wheat in the early producing area of Texas. Weakness at Chicago was attributed mainly to nearness of the new crop and slow mill demand despite continued light country marketings. Ordinary-protein spring wheat weakened but high-protein spring and durum wheat finished a little stronger at Minneapolis as buyers were fairly aggressive in view of light receipts. White wheat held firm at Portland with limited offerings and a lack of fresh export trade. Bids on new-crop white wheat, however, were 13-14¢ per bushel under current prices of old-crop offerings. Rye dipped 4¢ at Minneapolis, influenced by only fair demand, nearness of the new crop, and partly by the lower price support rate.

Corn closed unchanged to slightly higher at principal markets. Light offerings found urgent demand. Shippers were active both for barge loadings and out-bound lake movement. Another strengthening influence was the report that the amount of corn under loan was less than had been anticipated earlier as a result of cash prices being well above the "low" loan rate. Oats, influenced mainly by light offerings, generally held steady. Barley was unchanged to slightly stronger at Minneapolis, but weakened at Portland and dropped sharply at Kansas City. Principal weakening influence was the shrinkage of export outlets. Grain sorghums went up 3-5¢ per cwt. and reached new crop-year highs as light offerings met good demand.

Oilseed markets were rather dull and trading was narrow. Soybeans finished a little weaker, while flaxseed closed unchanged.

**GRAIN STORAGE CAPACITY:** Grain elevator storage capacity at 45 principal terminal markets increased about 15 percent during the past year and totaled around 1 billion bushels on May 1, 1959. This was 139 million bushels more than the 895 million-bushel capacity at these elevators on June 1, 1958. In addition, storage for about 42 million bushels is under construction and expected to be completed by harvest time or the end of the year. Storage capacity increased sharply in most regions, particularly in the western two-thirds of the country. (See table on page 7) Most of the gain in the West Central, Southwestern and Western regions was in Salina and Wichita, Kansas; Kansas City, Missouri; and Amarillo, Fort Worth and Lubbock, Texas. The Duluth-Superior and Minneapolis area accounted for most of the increase in the Northwest and Upper Lake region, while Indianapolis and Memphis provided most of the gain in the East Central region. Portland and San Francisco areas accounted for the bulk of the Pacific Coast increase. The Lower Lake area showed only a slight gain, while storage capacity at Atlantic and Gulf Coast terminal markets was unchanged. Capacity of warehouse facilities approved under the Uniform Grain Storage Agreement totaled almost 3.6 billion bushels on March 31, 1959. This was nearly 763 million bushels or 27 percent more than the 2.8 billion the same date a year earlier. States showing the sharpest gains were in the same areas as in the case of terminal elevators. Although the 3.6-billion-bushel capacity of warehouse facilities approved under the Uniform Grain Storage Agreement does not include all storage capacity, it is estimated that over 80 percent of the warehouse capacity was under the agreement March 31, 1958, and practically all of the storage built in the past year was under the program.

**OATS AND RYE PRICE SUPPORT RATES:** County price support rates for 1959-crop oats and county and terminal support rates for 1959-crop rye have been announced. Rates are based on the 1959 national average support price of 50¢ per bushel for Grade No. 3 oats and of 90¢ per bushel for rye grading No. 2 or better or No. 3 on the factor of test weight only.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats, or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

1/ No program

Farmers put 16.3 million bushels of 1958-crop corn under price support during April, bringing the total for the season through April 30 to slightly over 349 million bushels. Of the total corn put under support, 318.3 million bushels were farm stored loans. Also, 142.9 million bushels or about 41 percent were from farms not in compliance with acreage allotments. Most of this non-compliance corn was in Illinois, Indiana, Iowa, Minnesota, Missouri, Nebraska, and South Dakota. Farmers had redeemed only 11.4 million bushels from price support loans through April 30.

## GRAIN MARKETS GENERALLY WEAK

Cash grain markets were generally unchanged to slightly lower during the week ended May 28. Weakness stemmed mainly from adjustments to new-crop basis, somewhat larger offerings, and only fair demand. Exceptions were higher prices for spring wheat and grain sorghums.

Winter wheat declined 3-7¢ at Kansas City and 6¢ at Fort Worth with early prospects of new-crop supplies and only light export and domestic demand. Winter wheat strengthened at Chicago and St. Louis, reflecting improved flour business. Spring wheat advanced 2¢ at Minneapolis as flour sales showed slight improvement. Durum wheat gained 2-3¢ as buyers became more active for light receipts. White wheat dropped 2¢ at Portland with trading very slow. Despite extremely light receipts, rye dropped 1¢ per bushel at Minneapolis.

Corn closed unchanged to 2¢ lower at the principal markets. Heavy exports of corn over the St. Lawrence Seaway have been an important price-supporting factor. However, with large stocks and continued large receipts, offerings were in excess of demand.

Oats weakened along with corn due to less active inquiry and prices were unchanged to 2¢ lower. Barley was unchanged to 2¢ higher at Minneapolis but generally weakened at other markets. No. 2 White oats closed at 58-61¢ and No. 2 Malting barley at \$1.18-1.28 per bushel at Minneapolis. Grain sorghums continued to advance and closed 3¢ per cwt. higher as light offerings met good demand.

Soybean markets continued weak with slow demand for both oil and meal. Prices closed 1-2¢ lower. Flaxseed bids continued unchanged throughout the week at Minneapolis.

GREAT LAKES EXPORTS: Grain cargoes inspected for export at Great Lakes ports during the week ended May 22 totaled 5.7 million compared with 5.1 million the previous week. Inspections during the first three weeks in May totaled 13.3 million bushels. This compares with 6.3 million bushels of all grains inspected for export from Atlantic ports, 28.6 million from the Gulf and 5.4 million from the Pacific ports. Of the inspections for export from the Great Lakes, there were about 1.9 million each of wheat, oats, and soybeans, 5.4 million of corn, 1.7 million of barley, 0.2 million each of rye and flaxseed. Further details of grain exports via the St. Lawrence Seaway will be published as information becomes available.

GRAIN EXPORTS: Exports of wheat and flour the first 11 months of the season, currently estimated at 398 million bushels, are around 40 million above the same period last season and 92 million above average. Flour exports are below a year ago with around 70 million bushels in grain equivalent exported the first 11 months -- about a million less than a year ago. Exports of corn in May, on the basis of inspection data, were considerably above a year ago with the total for October-May, at 138 million bushels -- 10 million bushels above a year ago. Barley exports of 3.5 million bushels in May brought the 11-month total to over 100 million bushels this year as against 78 million in 1957-58. Soybean exports of 78 million bushels the first 8 months were 12 million more than last year.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats, or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

# COMMODITY CREDIT CORPORATION INVENTORY AND SALES

## GRAIN MARKETS MIXED

Cash grain markets showed a mixed price trend during the week ended June 4. Wheat, barley and soybeans weakened; corn, oats and rye strengthened; and grain sorghums and flaxseed were generally unchanged.

Weakness in winter wheat at principal markets generally reflected the rapid progress of new-crop harvesting. This was offset partly, however, by good mill and export demand which readily absorbed rather light offerings. Bids weakened on Spring and Durum wheat at Minneapolis as light offerings proved more than ample for relatively slow demand. White wheat turned unevenly lower on a change to a new-crop basis at Portland where export trade continued slack. Rye went up 5¢ on No. 2 at Minneapolis.

Strength in corn was attributed mainly to lighter offerings by farmers, good domestic demand and continued heavy exports. Support for oats stemmed from more active buying interest and smaller receipts. Barley averaged about unchanged in dull trading with offerings about equal to only fair demand. Grain sorghum prices fluctuated for the week but closed about unchanged. Demand was good and offerings increased as stocks that had been held in firm hands were being sold, reflecting the nearness of the new crop in South Texas.

Soybeans weakened slightly despite firmness in soybean oil and continued good export demand for beans. Flaxseed remained unchanged at Minneapolis with light crusher and export interest.

WHEAT MARKETING QUOTA AND REFERENDUM: The Secretary of Agriculture this week proclaimed marketing quotas for the 1960 wheat crop; proclaimed a national wheat acreage allotment of 55 million acres (the minimum permitted by law); announced state shares of the national allotment; set July 23, 1959, as the date for a referendum to determine producer approval or disapproval of quotas; and announced a 39-state commercial and a 10-state noncommercial wheat-producing area for 1959. This seventh proclamation of wheat marketing quotas is required by a wheat supply that is 99.6 percent above the normal supply level.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats, or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

**COMMODITY CREDIT CORPORATION INVENTORY AND SALES**  
(All data in 1,000 bushels except grain sorghums in 1,000 cwt.)

Estimated CCC non-committed inventory for week ended May 29, 1959

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

**GRAINS: Inspections for export by ports and lake shipments to Canada**

1/ Carlot receipts have been converted to bushels on the basis that 1 carlot equals 1,750 bushels.

2/ Of the April receipts, all were Yellow soybeans. Inspections of soybeans in April included 4,283,078 bushels as cargo lots, 1,294,917 bushels as truck receipts, and the balance as carlot receipts.

Based on reports of inspections by licensed grain inspectors at all markets.

1/ Based on Census Bureau reports that a bushel of soybeans yields 11.0 pounds of oil and 47.0 pounds of meal.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil or soybean meal.

## GRAIN MARKETS WEAKEN

Most cash grain markets closed unchanged to lower for the week ended June 11. Rye, however, showed independent strength. Softness was attributed mainly to the increasing movement of some new-crop grains and to the rapidly approaching harvest of others.

Winter wheat finished unchanged to 5¢ per bushel lower at principal markets. Weather was almost ideal for maturing and harvesting in the Southwest. Cutting gained momentum in Texas and Oklahoma, while the first four cars of 1959-crop wheat were offered at the Kansas City market this week. Demand was generally good, and most new-crop wheat moved into trade channels. Spring and durum wheat were generally unchanged in quiet trading at Minneapolis. White wheat prices were down 2¢ on Soft and 2-5¢ on Hard on adjustments to a new-crop basis at Portland. Trading was very limited with slow demand offsetting short free market stocks. Rye, bolstered by reports of dry weather in some producing areas and good demand, went up 3¢ at Minneapolis.

Corn finished about unchanged for the week as slight gains at some markets generally offset slight declines at others. Marketings by farmers continued light and found ready outlets, particularly for export via the St. Lawrence Seaway. Oats also closed about unchanged, but barley weakened in slow trading with buyers rather indifferent toward new-crop offerings. Grain sorghum prices dropped 4¢ per cwt. at Kansas City and 13¢ at Fort Worth. Offerings were light but demand was only fair as buyers awaited new-crop offerings with the South Texas harvest just around the corner.

Soybean prices slipped 1-2¢ per bushel in narrow trading. Flaxseed held unchanged at Minneapolis.

---

### Special Features

|                                                           | <u>Page</u> |
|-----------------------------------------------------------|-------------|
| Feed grains - payment-in-kind export bids.....            | 2           |
| Wheat - estimated production by states, June 1, 1959..... | 7           |
| Grains - United States imports.....                       | 8           |

CROP PROSPECTS: Production of all wheat in 1959 was predicted at nearly 1.2 billion bushels by the Crop Reporting Board on June 1. The prospective crop is 19 percent less than the 1958 crop but 10 percent above the 1948-57 average. Winter wheat prospects slipped 2 percent during May and on June 1 were estimated at 941 million bushels. This is 20 percent below last year but 16 percent above average and still the fifth largest of record. June 1 conditions indicate a Spring wheat crop of 240 million bushels, 15 percent below last year and 8 percent below the 10-year average. Condition of rye on June 1 was reported at 84 percent of normal, unchanged from the two previous months but 5 points below a year earlier and 3 points above average.

OATS PRICE SUPPORT: Price support eligibility requirements for 1959-crop oats are being broadened to include "badly stained or materially weathered" oats. Under the broadened provisions, oats reduced to grade No. 4 because of the grading factor of "badly stained or materially weathered" will be eligible for support at a discount of 7¢ per bushel from the basic county support rate. Any premium for test weight of 36 or more pounds per bushel provided in price support provisions will not apply to these weather damaged oats.

WHITE AND SOFT RED WINTER WHEAT P. L. 480 EXPORT: No change is contemplated in the eligibility of White Wheat and Soft Red Winter Wheat for export under Title I, Public Law 480. These wheats, including all subclasses of each, were made eligible for P. L. 480 export last summer. Subclasses included under the White Wheat are Hard White, Soft White, White Club, and Western White, and those under the Soft Red Winter wheat classification are Red Winter and Western Red.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats, or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

# COMMODITY CREDIT CORPORATION INVENTORY AND SALES

(All data in 1,000 bushels except grain sorghums in 1,000 cwt.)

## GRAIN MARKETS MIXED

Wheat strengthened but most other cash grains closed unchanged to slightly lower for the week ended June 18.

Winter wheat, influenced by rather light country selling and fairly good domestic and export demand, generally advanced 1-3¢ per bushel. However, prices went down 2-4¢ on ordinary protein hard wheat and 2-3¢ on soft wheat at Kansas City as most arrivals of new-crop wheat were low in milling strength. The tight holding policy of farmers reflected wagon prices that were 5-15¢ under net loan value, adequate storage space, and low moisture content of the crop thus far which pointed to good "keeping" qualities. Spring wheat strengthened slightly on light country selling and good buying interest, but Durum wheat prices softened as buyers worked on more limited orders and were indifferent to offerings. White wheat finished 1-4¢ per bushel lower on further adjustments to a new-crop basis at Portland. Rye went down 1-4¢ under pressure from nearness of the new crop at Minneapolis.

Cash corn prices fluctuated within a narrow range but closed about unchanged for the week as relatively moderate offerings continued to meet good domestic and export demand. Oats and barley finished unchanged to slightly lower in generally dull trading. Grain sorghum prices dropped 7-8¢ per cwt. at Kansas City on reports of the first shipment of new-crop milo in South Texas. However, prices held steady in dormant trading at Fort Worth where buyers were cool toward current offerings and continued to await volume movement of the new crop.

Soybeans closed a little weaker, reflecting the lack of any active demand and continued selling by CCC of soybeans taken over under the loan program. Flaxseed held unchanged in Minneapolis.

CANADIAN SEEDING PROGRESS: An estimated 88 percent of the total Canadian acreage expected to be sown to spring wheat, oats, barley, flaxseed and mixed grains were seeded by May 31, according to the Dominion Bureau of Statistics. This is slightly behind the 94 percent seeded at this time in both 1958 and 1957. The percentages seeded by May 31 of the intended acreage of the five major crops for Canada, with corresponding figures for 1958 in parentheses, are as follows: spring wheat, 95 (100); oats, 86 (92); barley, 80 (92); flaxseed, 70 (81); mixed grains, 82 (91); and total, 88 (94). Winterkilling of winter wheat and fall rye was higher this year. In Ontario, where most of Canada's winter wheat is grown, the Bureau estimated that 38 percent of the area seeded in the fall of 1958 was winterkilled compared with 5 percent the pervious year. Winterkilling of rye was estimated at 12 percent as against 5 percent the year before.

NEW INDUSTRIAL USES FOR WHEAT: Wheat flour has been modified by USDA chemists into products having potential uses as thickening agents, adhesives, and coatings and sizes for paper and textile manufacture. The Agricultural Research Service, seeking to broaden markets for farm products, has demonstrated that chemically modified flour mixes readily with water to form a free-flowing paste -- properties desirable for such industrial processes as continuous machine-coating of paper.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats, or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

**COMMODITY CREDIT CORPORATION INVENTORY AND SALES**  
(All data in 1,000 bushels except grain sorghums in 1,000 cwt.)

Estimated CCC non-committed inventory for week ended June 12, 1959

## GRAIN MARKETS REMAIN MIXED

Cash grain markets continued to show a very mixed trend during the week ended June 25. Trading was spotty -- active for some grains but slow for others.

Winter wheat closed 2-4¢ per bushel lower at Kansas City but was steady to 3¢ higher at other principal markets. Weakness at Kansas City reflected the influx of new-crop wheat as harvesting was in high gear over most of the winter wheat area. Quality was good and demand readily absorbed most of the sizable offerings. Farmers sold freely in areas where cash prices were above support but pursued a tight holding policy where cash prices were under loan value. Strength at other winter wheat markets was attributed to light offerings and aggressive domestic and export demand. Spring wheat, influenced by higher futures prices, unfavorable moisture conditions and high temperatures, advanced 4¢ at Minneapolis. Durum wheat was unchanged. Demand for white wheat remained limited and matched light supplies at Portland where prices remained about steady. Rye dropped 9¢ per bushel at Minneapolis, influenced by nearness of the new crop and trade reports that rye was being shipped from the United States to Canada.

Corn weakened slightly in the face of continued good demand as offerings proved fully ample for trade needs. Oats strengthened a little on reports of insect and crop damage in rapidly maturing fields. Barley, on the other hand, ruled unchanged to slightly weaker behind slower demand. Grain sorghums held unchanged with good demand for limited offerings at Kansas City, but prices went down 5¢ per cwt. at Fort Worth as new-crop harvesting moved into full swing in South Texas.

Soybean prices declined 2-4¢ per bushel at Chicago, influenced by shutdowns of processing plants and continued CCC selling of take-over beans. Prices, however, were unchanged at Illinois country points and Minneapolis. Flaxseed held steady in quiet trading at Minneapolis.

| Grains - United States exports.....                           | 7 |

SOYBEAN PRICE SUPPORT: County price support rates for 1959-crop soybeans have been announced. Rates are based on the 1959 national average support price of \$1.85 per bushel. County support rates generally reflect the 24¢-per-bushel reduction in the 1959 national average support from the 1958 average of \$2.09 per bushel. Terminal rates are not established for soybeans. Only change in the price support premium and discount schedule provides for monetary premiums and discounts for foreign material.

SOYBEAN AND FLAXSEED CRUSHING: Soybean crushings in May totaled 36.4 million bushels compared with 34.6 million the month before and 32.2 million a year earlier. Eight-month crushings now total a record 279.1 million bushels as against 238.5 million during the October-May period last year. Crushings of 1.7 million bushels of flaxseed in May brought the 11-month (July-May) total to a little over 21 million bushels, or about 5 million less than the same period a year earlier.

IWA SALES: Sales of wheat and flour under the International Wheat Agreement Program during the week ended June 23 totaled 326,000 bushels. This brought sales for the season to date to 80.1 million bushels compared with 88.1 million a year earlier. Balance remaining for sale under this season's quota is 48.7 million bushels as against 40.4 million a year ago.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats, or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

# COMMODITY CREDIT CORPORATION INVENTORY AND SALES

(All data in 1,000 bushels except grain sorghums in 1,000 cwt.)
